EPEE now full member of ICARHMA

On 28 October EPEE participated in the Annual Meeting of The International Council of Air-Conditioning, Refrigeration, and Heating Manufacturers Associations (ICARHMA), which took place in Rio de Janeiro, Brazil, and was hosted by ICARHMA's Brazilian member, ABRAVA.

During the meeting it was announced that EPEE is now a full member of ICARHMA.

[ICARHMA](#) is a global organization comprised of nine heating, ventilation, air conditioning, refrigeration, and water heating manufacturers' associations that represent a combined total of more than 1,000 manufacturing companies, valued at US\$225 billion and that produce approximately 85% of the world's heating and cooling equipment. Its members represent manufacturers in the Americas, Europe, Asia and the Pacific region.

EPEE looks forward to working closely with ICARHMA in the foreseeable future, both in Brussels and elsewhere around the world.

The ICARHMA press release concerning the AGM can be found [here](#).
