

EPEE welcomes F-gas adoption in Council

14 April 2014: EPEE warmly welcomes today's adoption by the Council of the F-gas regulation.

EPEE members believe that the final agreement will help to position the EU as a strong actor on HFCs and will send a strong message to industry to switch to lower GWP technologies as soon as possible.

EPEE will take its responsibility seriously to ensure an appropriate promotion and understanding of the rules within industry. Today's press release from the Council can be found [here](#).

The Regulation will be published in the EU's Official Journal in the coming weeks.

If you have any questions about EPEE or the F-gas regulation, please do not hesitate to get in touch.

About EPEE:

The European Partnership for Energy and the Environment (EPEE) represents the refrigeration, air-conditioning and heat pump industry in Europe. Founded in the year 2000, EPEE's membership is composed of 40 member companies, national and international associations.

EPEE member companies realize a turnover of over 30 billion Euros, employ more than 200,000 people in Europe and also create indirect employment through a vast network of small and medium-sized enterprises such as contractors who install, service and maintain equipment.

EPEE member companies have manufacturing sites and research and development facilities across the EU, which innovate for the global market.

As an expert association, EPEE is supporting safe, environmentally and economically viable technologies with the objective of promoting a better understanding of the sector in the EU and contributing to the development of effective European policies. Please see our website (www.epeeglobal.org) for further information.
